Indexing applies CONCEPTS to the oral history interview transitions, providing users with a descriptive search and browse framework at the segment level (OHMS “Getting Started” documentation, V 2.1.19, 2014).

- Connect users to moments in an interview that correspond to their search results
  - Synchronize audio or video recordings to transcripts
  - Index audio or video allowing text searchability at the segment level

OHMS METADATA: TRIAL AND ERROR

- Item-level summary field
- Segment-level synopses and subject fields
- Migrating segment level keywords to catalog records
APPROACHES TO “MAPPING” ORAL HISTORIES

- Faster access or perfect metadata
- Meaningful intra-unit access
- Meaningful unit access and discoverability
- Balancing resources and value added
CATALOG VERSUS INDEX OR CATALOG AND INDEX
